LETTER OF TRANSMITTAL

Sacramento, October 1, 1967

THE HONORABLE GEORGE MILLER, JR., *Chairman*
and Members of the Joint Legislative Budget Committee
State Capitol, Sacramento, California

GENTLEMEN :

This report continues a series started in September 1948 which lists and indexes all interim legislative committees and interim committee reports from 1937 to date. Prior to 1955 the indexes and their supplements were cumulative from 1937. Beginning with 1955 the indexes have been on a biennial basis. Thus a complete record of interim committee reports from 1937 may be obtained by reference to the 1953 report plus its 1954 supplement and the biennial reports dated 1955, 1957, 1959, 1961, 1963, 1965 and 1967.

This report follows in general the same procedure as the previous biennial reports and is in two parts: (a) the committees created or continued by the 1965 General Session or by the 1966 Budget and Special Sessions for reporting to the 1967 session, together with citations to their reports, and (b) committees authorized or continued by the 1967 General and Special Sessions.

Every effort has been made to provide a continuity of reporting for all of the reports of interim committees. Prior to 1967, sessions of the Legislature were alternately General and Budget Sessions in the odd and even numbered years, respectively, with a limitation on the length of the sessions. This meant that most of the reports of interim committees were made to the Legislature in the odd numbered years and prior to June 30. With the constitutional change authorized by Proposition 1-A in 1966, sessions of the Legislature are now annual general sessions with no limitation on the length. This will undoubtedly change the cycle for both the action of, and the reporting by, interim committees. Most of the resolutions of the 1967 Session authorizing interim studies have directed that reports be made to the 1968 Session. Committee activity indexed in this publication includes, because of the changed cycle of sessions, reports made to the Legislature and new committees created for the period through the end of the 1967 Veto and First Extraordinary Session which closed on September 7.

Committees which have had a more or less continuous program can be traced chronologically through the use of the subject index in each report. The list also includes committees, boards and commissions having legislative members and which are created on a continuing basis. These are included for the reason that, in most instances, the legislative members of boards or commissions are authorized to act as interim legislative committees.

Information relating to each committee, whenever available, includes a reference to its legal authority, number of members and the chairman, a brief statement of the scope of the committee's activities and a

listing of its printed reports. In case there have been changes in the chairmanship during the interim, both are indicated in order of service. The serial numbers which have been assigned to each committee are for the purpose of facilitating indexing and have no significance otherwise. The reports listed may be found either in the Senate and Assembly Daily Journals, their supplements, or in the State Library. Most of the reports have been printed by the Office of State Printing and issued as separate reports.

As an aid to the use of this report, the committees have been arranged in alphabetical order by house and a combined index covers both the identifying name of the committee and the subject of its reports. The names of committee chairmen have been included in the index. The chief abbreviations used are as follows:

KEY TO ABBREVIATIONS

AB	Assembly Bill	SB	Senate Bill
ACR	Assembly Concurrent Resolution	SCR	Senate Concurrent Resolution
AJ	Assembly Journal	SJ	Senate Journal
HR	House Resolution	SR	Senate Resolution

Copies of interim committee reports are available on loan from the State Library in Sacramento and, in the case of most of those printed as separate documents, available through the respective mail rooms of the Senate and the Assembly, or by inquiry addressed to the chairman of the committee.

Respectfully submitted,

A. ALAN POST
Legislative Analyst

LETTER OF TRANSMITTAL

Sacramento, December 31, 1969

THE HONORABLE STEPHEN P. TEALE, *Chairman*
and Members of the Joint Legislative Budget Committee
State Capitol, Sacramento, California

GENTLEMEN :

This report continues a series started in September 1948 which lists and indexes all interim legislative committees and interim committee reports from 1937 to date. Prior to 1955 the indexes and their supplements were cumulative from 1937. Beginning with 1955 the indexes have been on a biennial basis. Thus a complete record of interim committee reports from 1937 may be obtained by reference to the 1953 report plus its 1954 supplement and the biennial reports issued in 1955 and in each odd numbered year thereafter.

This report follows in general the same procedure as the previous biennial reports and is in two parts: (a) the committees created or continued by the 1967 Regular and First Extraordinary Sessions or by the 1968 Regular and First Extraordinary Sessions for reporting to the subsequent sessions, together with citations to their reports, and (b) committees authorized or continued by the 1969 Regular Session.

Every effort has been made to provide a continuity of reporting for all of the reports of interim committees. Prior to 1967, sessions of the Legislature were alternatively General and Budget Sessions in the odd and even numbered years, respectively, with a limitation on the length of the sessions. This means that most of the reports of interim committees were made to the Legislature in the odd numbered years and prior to June 30. With the constitutional change authorized by Proposition 1-A in 1966, sessions of the Legislature are now annual regular sessions with no limitation on the length. A constitutionally required veto session after the recess of 30 days is limited as to subject matter but may also create committees and receive reports. This has significantly changed the cycle for both the acts and reporting by interim committees.

Committees which have had a more or less continuous program can be traced chronologically through the use of the subject index in each report. The list also includes committees, boards and commissions having legislative members and which are created on a continuing basis. These are included for the reason that, in most instances, the legislative members of boards or commissions are authorized to act as interim legislative committees.

Information relating to each committee, whenever available, includes a reference to its legal authority, number of members and the chairman, a brief statement of the scope of the committee's activities and a

listing of its printed reports. In case there have been changes in the chairmanship during the interim, both are indicated in order of service. The serial numbers which have been assigned to each committee are for the purpose of facilitating indexing and have no significance otherwise. The reports listed may be found either in the Senate and Assembly Daily Journals, their supplements, or in the State Library. A considerable number of the reports have been printed by the Office of State Printing and issued as separate reports.

As an aid to the use of this report, the committees have been arranged in alphabetical order by house and a combined index covers both the identifying name of the committee and the subject of its reports. The names of committee chairmen have been included in the index. The chief abbreviations used are as follows:

KEY TO ABBREVIATIONS

AB	Assembly Bill	SB	Senate Bill
ACR	Assembly Concurrent Resolution	SCR	Senate Concurrent Resolution
AJ	Assembly Journal	SJ	Senate Journal
HR	House Resolution	SR	Senate Resolution

Copies of interim committee reports are available on loan from the State Library in Sacramento and, in the case of most of those printed as separate documents, available through the respective mail rooms of the Senate and the Assembly, or by inquiry addressed to the chairman of the committee.

Respectfully submitted,

A. ALAN POST
Legislative Analyst

LETTER OF TRANSMITTAL

Sacramento, October 31, 1971

THE HONORABLE STEPHEN P. TEALE, *Chairman*
and Members of the Joint Legislative Budget Committee
State Capitol, Sacramento, California

GENTLEMEN :

This report continues a series started in September 1948 which lists and indexes all interim legislative committees and interim committee reports from 1937 to date. Prior to 1955 the indexes and their supplements were cumulative from 1937. Beginning with 1955 the indexes have been on a biennial basis. Thus a complete record of interim committee reports from 1937 may be obtained by reference to the 1953 report plus its 1954 supplement and the biennial reports issued in 1955 and in each odd numbered year thereafter.

This report follows in general the same format and content as the previous biennial reports, except that the constitutional change beginning in 1967 for annual unlimited sessions and the current trend toward longer sessions has introduced two changes. Most of the committee activity and reporting has taken place during the session and by committees which are either actually, or more in the nature of, standing committees than "interim" committees in the sense of interim committees at the time this system of reporting was initiated. For this reason the word "Interim" has been dropped from the title. Similarly, since the 1971 session has not closed at the time of this reporting (October), it is not practical to give a complete listing of committees created by this session for the purpose of reporting to the next session. However, the pattern of committee continuity from year to year is now such that the distinction has less significance than was the case a number of years ago.

Committees which have had a more or less continuous program can be traced chronologically through the use of the subject index in each report. The list also includes committees, boards and commissions having legislative members and which are created on a continuing basis. These are included for the reason that, in most instances, the legislative members of boards or commissions are authorized to act as interim legislative committees.

Information relating to each committee, whenever available, includes a reference to its legal authority, number of members and the chairman, a brief statement of the scope of the committee's activities and a listing of its printed reports. In case there have been changes in the chairmanship during the interim, both are indicated in order of service. The serial numbers which have been assigned to each committee are for the purpose of facilitating indexing and have no significance otherwise.

The reports listed may be found either in the Senate and Assembly Daily Journals, their supplements, or in the State Library. Some of the reports have been printed by the Office of State Printing and issued as separate reports.

As an aid to the use of this report, the committees have been arranged in alphabetical order by house and a combined index covers both the identifying name of the committee, its chairman, and the subject of its reports. The chief abbreviations used are as follows:

KEY TO ABBREVIATIONS

AB	Assembly Bill	SB	Senate Bill
ACR	Assembly Concurrent Resolution	SCR	Senate Concurrent Resolution
AJ	Assembly Journal	SJ	Senate Journal
HR	House Resolution	SR	Senate Resolution

Copies of interim committee reports are available on loan from the State Library in Sacramento and, in the case of most of those printed as separate documents, available through the respective mail rooms of the Senate and the Assembly, or by inquiry addressed to the chairman of the committee.

Respectfully submitted,

A. ALAN POST
Legislative Analyst

Hon. Donald L. Grunsky, Chairman
and Members of the Joint
Legislative Budget Committee
Room 3070, State Capitol
Sacramento, California

Gentlemen:

This report continues a series started in September 1948 which indexes all interim legislative committees and interim committee reports from 1937-1969, and all reports of standing and select committees, as well as major subcommittees, from 1969 through 1973.

The constitutional changes of 1967 and 1972, which provided for unlimited annual sessions and two-year sessions respectively, appear to have ended the creation of interim committees. Most committee reports are now issued by the standing and select committees. This report includes all such committees which were in existence between November 1971, and December 1973. As in the past, boards and commissions with legislative members are also included.

Indexed information covers each committee's chairman and number of members, a brief statement of its scope, and a list of its reports, if any. When there have been changes in a committee's chairmanship during the index period, each is listed in order of service. In many cases the reports listed are out of print; most can be obtained in the State Library or, in some cases, by writing the committee chairman.

For many years, this index series was the only guide to interim committees and their work. However, now that interim studies are performed by standing and select committees, legislative reports are usually

Hon. Dennis E. Carpenter, Chairman
and Members of the Joint
Legislative Budget Committee
Room 2062, State Capitol
Sacramento, California

Gentlemen:

This report continues a series started in September 1948 which indexes all interim legislative committees and interim committee reports from 1937-1969, and all reports of standing and select committees, as well as major subcommittees, from 1969 through 1973.

The constitutional changes of 1967 and 1972, which provided for unlimited annual sessions and two-year sessions respectively, appear to have ended the creation of interim committees. Most committee reports are now issued by the standing and select committees. This report includes all such committees which were in existence between January 1974 and December 1976. As in the past, boards, councils, and commissions with legislative members are also included.

Indexed information covers each committee's chairman and number of members, a brief statement of its scope, and a list of its reports, if any. When there have been changes in a committee's chairmanship during the index period, each is listed in order of service. In many cases the reports listed are out of print; most can be obtained in the State Library or, in some cases, by writing the committee chairman.

For many years, this index series was the only guide to interim committees and their work. Now that interim studies are performed by standing and select committees, many legislative reports are documented

Hon. Dennis E. Carpenter

February 24, 1977

in State Library acquisition publications and in lists prepared by the research offices of the Legislature. Committees and their chairmen and members are listed in the Daily Files of the Senate and Assembly, as well as in the Final Calendar of Legislative Business. However, these sources remain scattered with none representing a complete compilation of the information concerning legislative committees and their reports. This index draws these and other sources together to provide a more complete accounting of the Legislature's publications and the subject matter of individual committees.

Respectfully submitted,

A. Alan Post
Legislative Analyst
